7. Mechanical Works.
8. Issues Related to Work Shop Drawings, As Built Drawings, Approvals and Similar.
9. Utilities and Infrastructure.
10. Municipalities Regulations.
11. Construction Ethics.

June 13, 2021 Training Material

Administrative training session:

- 1- Filing letters by site engineers and fresh graduate engineers:
 - A description was given to site engineers and fresh graduates regarding the approved way of filing letters directly received from the main office, and how they should follow a certain sequence, put in separate files and arranged according to the subject of the letter.
- 2- Fresh graduates should participate in following the process of answering letters at their sites, by reminding both site senior engineers and packages' managers of the letters still pending to make sure they are answered within the period specified in the contract.
- 3- We stressed on certain issues concerning NCRs (Quality/ Health Safety and Environment Non-Conformance Reports), and explained how they fall under certain engineers' responsibility in accordance with their specialty.
- 4- Speaking of RFIs (Request for Information), we pointed out that our site engineers and fresh graduates alike should pay attention to the sequence of the RFIs submitted directly by the Contractor, their reference number and the name of the school, since we are keen to avoid repetition in reference numbers and the relation between the context and the school mentioned in the RFI form.
- 5- Regarding photos taken at the sites, we reminded everyone to make sure they cover all works done on daily basis, and to pay more attention when receiving guests, (examples: Covering safety procedures each visitor must go through, following the course of the visit step by step and focusing their cameras on every detail discussed, while providing the main office with the main topics discussed throughout the visit).
- 6- About daily and weekly reports, we expressed how important it is to send them as early as possible since they go through a process that indulge choosing their photos, making sure they are following the same format, and editing sometimes.
- 7- Providing data required for the monthly report beforehand is also necessary, in order to review them and make sure they are up to date, following all construction work done monthly, and to avoid any possible mistakes in the information provided.

SKEP III site staff and fresh graduate engineers participating in the training

Trainers gave a breif about the awareness of filing, RFIs and NCRs, photos capturing, and reports (daily, weekly, and monthly)
